DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 9, 10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buckley (5,400,743) in view of Bellows (5,582,135). Buckley shows a pet house 10 having a house-shaped box including front wall 40 defining a door, a rear wall, and two lateral walls 36, the front and rear walls including upper portions 22, 24 extending above the lateral walls 36 and a roof 28 mounted on the upper portions 22, 24 of the front and rear walls. The lateral walls 36 having at least one reinforcement devices/rib 26. Buckley does not disclose making the house of paper. Bellows shows a house-shaped pet enclosure 11 constructed of a form of paper, i.e. reinforced cardboard. With respect to claim 1, to use the cardboard/paper material of Bellows with the house of Buckley would have been obvious to one skilled in the art in order to reduce manufacturing costs.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Buckley in view of Bellows as applied to claim 1 above, and further in view of Kolozsvari et al (D420,470). Kolozsvari et al show a pet house having a door, front and rear walls, lateral walls, and a roof. The lateral walls having a plurality of windows defined therein. With respect to claim 2, to use the plurality of windows of Kolozsvari et al with the pet

house combination of Buckley and Bellows would have been obvious to one skilled in the art in order to provide more ventilation to the pet house without removing the walls of the pet house completely.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buckley in view of Bellows as applied to claim 1 above, and further in view of Allawas (6,092,488). Allawas shows a pet house having a rear wall 7, lateral walls 11, a roof 17. The front wall is closed by a shutter 5 included a U-shaped frame 51 for receiving the shutter 5 and the shutter 5 having a slot 37 for facilitating the operation thereof. With respect to claim 3, to use the closing shutter of Allawas with the pet house combination of Buckley and Bellows would have been obvious to one skilled in the art in order to occasionally confine the animal when necessary or to keep the pet house from becoming dirty if not being used for long periods of time.

Allowable Subject Matter

Claims 6-8, 11, 12 and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

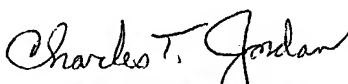

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference on pet houses are: Greitzer et al (5,081,956), Gonzalez (5,121,710), Willinger et al (5,964,190) and Leeming (GB 2,241,144).
